

Chilliwack Secondary School Science 10 Honours Application

Dear Student:

Our Science 10 Honours classes at Chilliwack Secondary School are designed to achieve the following goals:

- Help students to continue to develop positive attitudes toward STEM (science, technology, engineering & mathematics)
- To further develop students' lab skills, foundational knowledge, and critical thinking skills beyond the regular Science 10 curriculum
- To develop strong study skills and habits
- To support students' goals, especially if they are considering careers in science or STEM
- To expose students to a rigorous program with a community of like-minded peers
- To help students become better prepared for all senior science courses at CSS, including our honours & AP (Advanced Placement) science courses
- To complete a rigorous science fair project of choice, for 2 extra graduation credits, and the chance to share your results at our annual science fair (with the possibility of competing at regionals & beyond!)

Successful applicants must have inquiring minds and be independent workers with a strong academic standing in Science 9 (Proficient or Extending).

If this describes you, and you are motivated & have a strong work ethic, then Science 10 Honours is for you!

*To be considered for the Science 10 Honours class, you must complete this entire application form (see reverse).

*Please hand-in your completed application form to your counselor, to the school office, or directly to Mrs. Broekhuizen in room 3169. Don't delay!
